

MEF Professional Services

Accounting Services Firm

THE CHALLENGE

Like most professional service firms, MEF's day-to-day client communication and online presence weren't getting the consistent attention they deserved — the kind of work that matters, but easily falls behind when a team is focused on serving clients.

WHAT WE DID

Feliglo stepped in to sharpen MEF's local communication and manage a range of ongoing online tasks that support daily operations. We're now actively working to strengthen MEF's visibility on Google, building toward stronger local search rankings.

THE RESULT

Client communication is clearer and more consistent, and MEF's online presence is finally being managed with intention rather than left as an afterthought — with search visibility work actively in motion.

"You have solved our problems in so many ways."
